*Toughened Curved Glass*

Glasshape Specialist Glass Products  
January / February 2009

Dear Client,

WELCOME TO 2009!

The end of 2008 was busy- with Glasshape staff finishing off larger jobs and clearing out all the smaller orders for installation before the holiday break – The photos below show two staircases both using 10 mm curved toughened glass, installed in Brisbane.

On the next page is a new home which has won design awards for its innovative architecture. The design includes extensive areas of curved glazing. The windows are toughened double glazed with grey tint, and the cupboard doors and floor to ceiling garden window are curved toughened glass. The curved window upstairs follows the contour of the kitchen area. An interesting design!

Glasshape's service has just got better. February sees our agent office in Sydney opening where onsite measure services will now be available. Details of this office will be released shortly!!
